

B&M NEWS

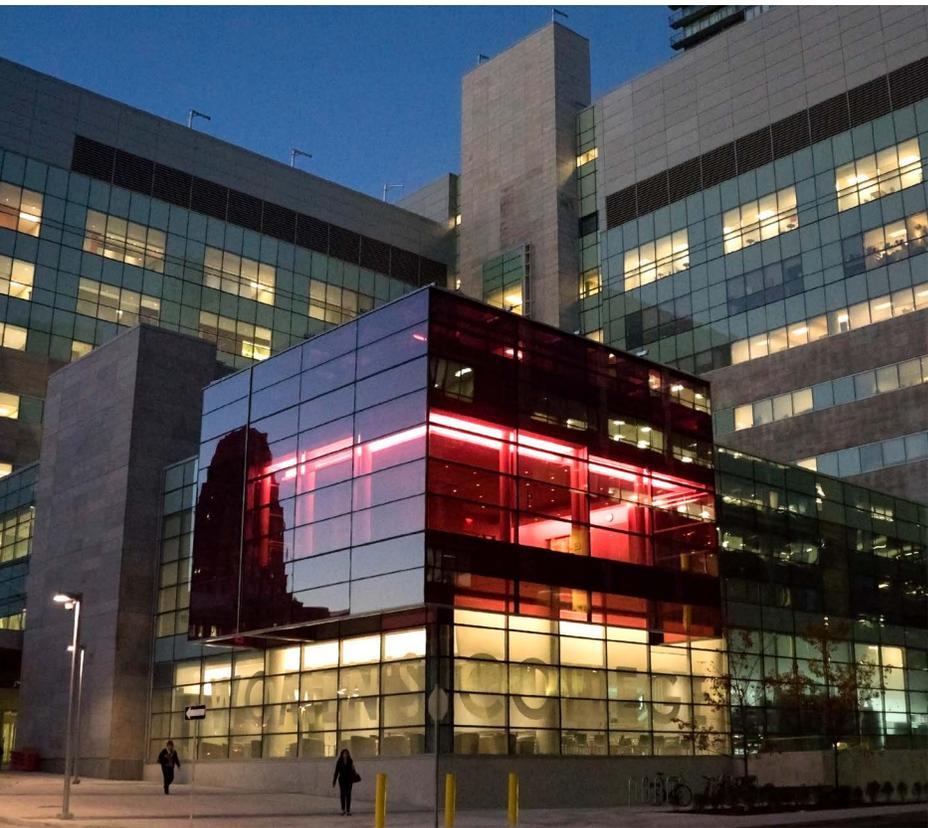

The Newsletter about Black & McDonald People and Projects Winter 2019

Refreshed Brand Positions B&M Strongly for the Future

Black & McDonald's groundbreaking Brand Review project, launched early in 2018, is now complete. The initiative generated a rich trove of research findings and strategic recommendations derived from the feedback we received from over 140 internal and external stakeholders, and a comprehensive competitive review.

Project Showcase: Women's College Hospital

Black & McDonald is part of a Public-Private Partnership (P3) that successfully bid to Design-Build-Finance-Maintain the redevelopment of Toronto's historic Women's College Hospital (WCH). B&M has demonstrated our wide-ranging capabilities on the project by delivering on everything from mechanical and electrical design and construction to complete facilities management solutions.

B&M was the Design-Build, integrated electrical-mechanical subcontractor for all phases of the 632,000 sq. ft., 13-storey redevelopment project. Our team completed all work while ensuring minimal disruption to the hospital's continuing day-to-day operations.

Refreshed Brand Positions B&M Strongly for the Future

CONTINUED FROM PAGE 1

Our New Brand Platform

We have incorporated these insights into a new brand platform for Black & McDonald. This new platform provides a clear framework that affirms our strategic direction and key strengths, identifies authentic brand attributes to help differentiate us in the marketplace, and provides compelling messages to help articulate our unique story. We've also mined the research findings to identify key opportunities for improvement and innovation to help us deliver on the evolving expectations of our clients and potential customers.

This new platform allows us to activate the full potential of our brand. We have developed a new corporate descriptor that promotes the complete strength of our offering and unifies our diverse business lines under a common banner. Our new brand positioning leverages and amplifies Black & McDonald's founding values and allows us to celebrate our capabilities and expertise in a way we've never done before.

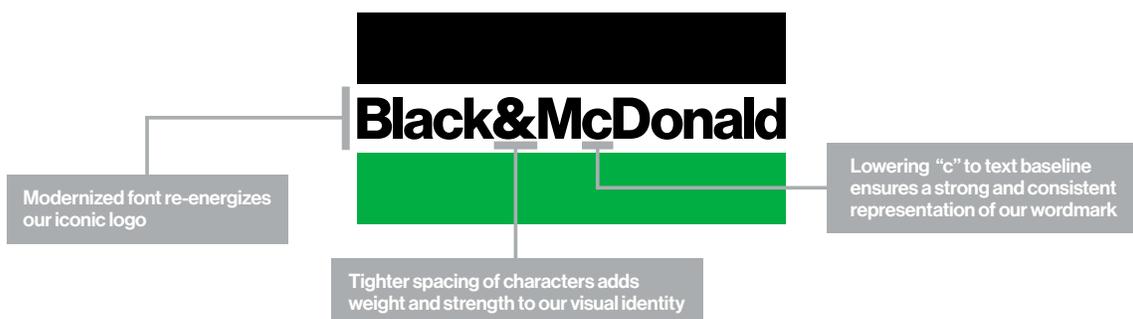

Our Refreshed Logo

We have refreshed our logo in the spirit of evolution, not revolution. By modernizing our font, we have re-energized our iconic logo. By tightening the character spacing within our wordmark, we have amplified the weight and strength of our visual identity. This subtle approach allows us to update the visual impression of our brand while we continue to benefit from the high brand awareness we already enjoy.

We've made another subtle but impactful adjustment by lowering the raised "c" in McDonald down to the text baseline.

This will help us achieve a strong and consistent representation of our logo without changing any of the fundamental elements that make our brand distinct.

Armed with a compelling new positioning in the marketplace, an evolved logo and new messages to help us articulate our capabilities and character, we are now ready to pursue the ambitious growth targets of our 2030 vision.

Refreshed Brand Positions B&M Strongly for the Future

Our Brand Architecture

Pillars of the Customer Experience

Full Spectrum Expertise	Uncompromising Standards	Genuine Partnership	Progressive Guidance
<p>Unlike other service providers, we have the breadth of experience, capabilities and resources to oversee full project and asset lifecycles — from design and build to maintenance, operations and management.</p>	<p>We are disciplined professionals who believe that technical excellence, meticulousness, and continuous improvement are the foundations for lasting success.</p>	<p>We treat others how we want to be treated and pride ourselves on being reliable, responsive and engaged partners in both good times and bad.</p>	<p>We are forward-thinking and creative problem solvers. We marry business acumen, customer understanding, and foresight to proactively find new ways to create and unlock value for our customers.</p>
<p>4000+ technical experts serving local markets across North America</p> <p>Nearly 100 years of diverse market experience and performance in some of the most challenging environments</p> <p>Unique, best-in-class partnerships and affiliations</p>	<p>Founder's Code of Business</p> <p>"Nobody Gets Hurt" Safety Pledge</p> <p>Ongoing investment in training and skills development</p>	<p>Family-owned and operated</p> <p>Long-term, "no finish line" philosophy for satisfying customers</p> <p>Best-in-class customer satisfaction scores</p>	<p>Transformative case studies across all service lines</p> <p>Ongoing thought leadership</p> <p>Culture of relentless inquiry</p>

Brand Character			Brand Values		
Committed	Collaborative	Hard-working	Live and work safely	Always improve	Build enduring customer relationships
Creative	Reliable		Do it right	Work for one another	Enable people to flourish

B&M Celebrates Best Ever Year for Safety Performance

Black & McDonald saw significant improvement in safety performance this year across all business units, with several reporting zero incidents for 2018. The severity of incidents is also down, with our leading indicators stronger than ever before. These results prove that the more proactive we are in mitigating hazards and effectively planning our daily work, the less downgrading incidents occur.

But now is not the time to take our foot off the gas. We need to maintain our focused efforts on injury reduction, particularly in light of our success. A key area that requires our constant attention are the repetitive tasks we carry out on a daily basis. When we fail to proactively identify and control hazards, we fall into the trap of Normalization of Deviance, and it's just a matter of time before we have an incident.

Key Steps to Ensure Our Continued Success:

- 1 Never use past success to redefine acceptable performance. Always assess potential risk factors and implement mitigation strategies on an ongoing basis.
- 2 Always verify process steps for routine work. Review your Pre Job Hazard Assessment (PJHA) with your team periodically to ensure that all steps are being completed.
- 3 Review the Project Safety Plan (PSP) and ensure it is updated on a regular basis.

Let's work together to build on the success of the past year by remaining vigilant and ever mindful of dangerous shortcuts that can become the norm.

Ray Pleasance
Corporate Director, Safety

PGR Recognized by Bruce Power and County of Bruce

B&M's Mark Healy (left) accepts the honour from Bruce Power CEO Mike Rencheck (centre) and Mike Smith, Mayor of Saugeen Shores (right).

Black & McDonald's Power Generation Region was recently recognized for its contribution to local economies and excellence in Ontario's nuclear industry at Bruce Power and the County of Bruce's 3rd Economic Development and Innovation Summit. Regional Vice President Mark Healy accepted the award on behalf of B&M from Bruce Power CEO Mike Rencheck and the Mayor of Saugeen Shores Mike Smith.

The summit brought together dozens of Bruce Power's nuclear supplier partners, County of Bruce municipal officials and staff, economic development professionals, and local business organizations in support of an initiative to boost local economies, draw families to the region, and promote innovation and excellence in nuclear power generation.

B&M opened its office in Tiverton, Ontario, in March 2017, and was awarded a key contract for Bruce Power's Unit 6 Major Component Replacement project in July 2018. At the peak of this project, B&M will employ locally more than 250 trades and 75 management and technical personnel.

Regions Join Forces for Major East Coast Energy Project

B&M team members erect a turbine base on site in Riverside-Albert, NB.

Black & McDonald is well known for its contributions to major wind energy projects across Atlantic and Eastern Canada and the United States. What B&M has yet to do is serve up a “full meal deal” wind energy project, delivering on all aspects of a farm from design through to commissioning. With the recent award of the Wisokolamson Energy Project, we now have the opportunity to do just that.

Slated for construction on a tract of Crown land approximately 12 kilometres west of the village of Riverside-Albert, New Brunswick, the project was developed by SWEB Development LP (SWEB) in partnership with Woodstock First Nation, a local Maliseet community. The project consists of five wind turbine generators with a generating capacity of 3.6 megawatts each for a total of 18 megawatts. The turbine towers will be the tallest ever installed in Eastern Canada.

B&M's Southern Ontario and Atlantic regions will combine capabilities and personnel to deliver on all aspects of this significant renewable energy project. Our team will be responsible for the production of full project design documents; management of all subcontractors for road construction and mass concrete foundations; construction of the substation, and a 17-kilometre overhead line, including all interconnection turbine collector cabling; erection of the wind turbines; and project commissioning and connection to the NB Power distribution grid.

The project represents the final step in B&M's evolution into a full service energy project supplier. In addition, the project marks the first job booked for B&M's new 8008 NB Utility Division.

B&M's Expanding Litmos LMS Catalogue

It has been six months since the official launch of Litmos, Black & McDonald's corporate Learning Management System (LMS). Litmos provides our employees with an engaging and learning-rich environment that can be accessed anytime and anywhere.

As we continue to support the needs of our growing business and the ongoing demand for new skills, knowledge and abilities, we are excited to announce the second phase of the Litmos LMS rollout. Beginning this winter, employees will have access to a new catalogue of business and technical eLearning courses.

In partnership with a third-party provider, we have sourced relevant courses to support employee development in high-demand areas, including:

- Business skills, such as Customer Focus and Effective Communication Skills;
- Industry-specific introductory courses, such as Construction Project Management, Project Scheduling (MS Project) and Facility Management & Operations;
- Microsoft Office training to support increased productivity, including basic, intermediate and advanced courses in MS Word, MS Excel, MS Outlook and MS PowerPoint.

We believe these new online learning opportunities will not only help our employees meet their current development needs but also support their personal career growth objectives and future aspirations. To learn more about our new eLearning course offerings in Litmos, contact your regional HR partner.

Kerry Shaw

Director, Training, Learning & Development

B&M's Fabrication Advantage

Interior views of our fabrication facilities in Dartmouth (left) and Saskatoon (right).

Black & McDonald is renowned for our capabilities on a construction site. Less well known, but no less impressive, are our behind-the-scenes manufacturing capabilities in support of diverse construction, retrofit and maintenance projects. B&M's five fabrication facilities across Canada give us the ability to add value and enhance quality for our customers by producing custom-made components and systems to meet any project need.

Fabrication services complement our operations in Dartmouth, Ottawa and Saskatoon, and from two separate shops in Toronto, one in Scarborough and one in North York. B&M's fabrication facilities specialize in a wide range of commercial and industrial applications, including piping, sheet metal, electrical, modular and custom fabrications, virtual construction and engineering services. Our fabrication teams produce materials for a wide range of sectors, including mining/smelting, oil & gas, health care, hospitality, and infrastructure.

B&M's manufacturing expertise dates back as far as the 1960s, when we acquired Toronto-based Leslie Bros. Inc., which has evolved over the years into our present day Custom Fabrication and Sheet Metal Division at 31 Pullman Court in Scarborough. Operations date back to the 1970s in Saskatchewan and the 1980s in Nova Scotia giving B&M's fabrication operations an impressive lineage.

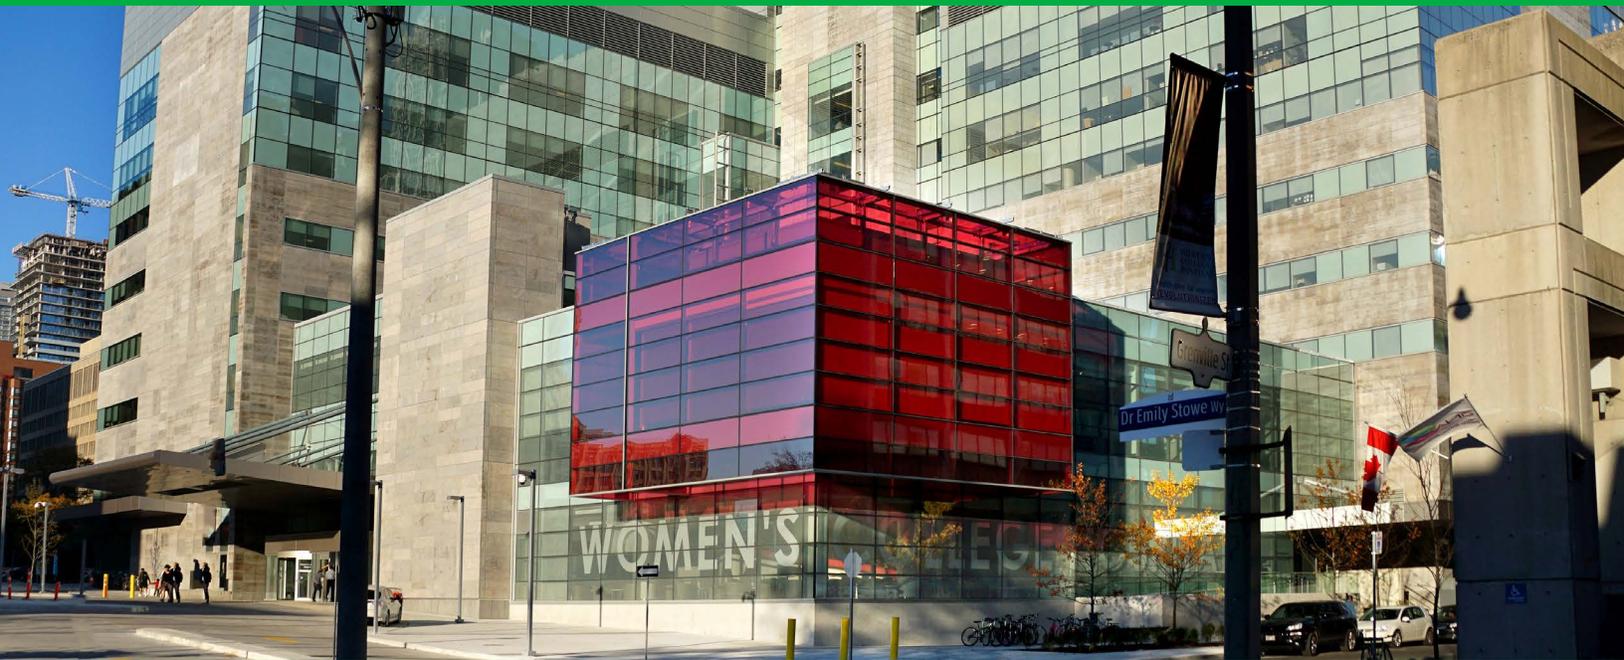

While our experience is confirmed by looking to the past, our capabilities are solidly forward-looking. Our Saskatoon and Toronto shops provide 3D modelling and reality capture services for commercial, industrial, and engineering clients, and employ CAD specialists and 3D scanning/modelling technicians, alongside traditional trades, including pipe welders, pipe fitters, and sheet metal workers. Clients can be assured that our on site equipment and technology are leading-edge, with our Saskatoon, Dartmouth, and North York facilities all commencing operations within the last five years.

B&M's fabrication services allow us to add value for our clients by delivering on every phase of a project lifecycle, or producing key, custom-made components to complete a larger system. Whatever the assignment, our fabrication services are a versatile resource to support our clients' needs.

Fab shop operations underway in (clockwise from bottom left) Saskatoon, Scarborough, Dartmouth, and Saskatoon.

Project Showcase: Women's College Hospital

CONTINUED FROM PAGE 1

B&M's mechanical team provided complete HVAC, plumbing and medical specialty systems, as well as a sophisticated building automation system. Our electrical team delivered turnkey services, which included complete design, project management and project commissioning. Coordinated 3D electrical and mechanical Building Information Modelling (BIM) drawings were a key deliverable for our integrated electrical-mechanical team, and will be an invaluable resource for WCH's owners and operators throughout the facility's lifecycle.

B&M's construction team completed its work on schedule in June 2016. The new WCH was awarded LEED Gold for construction, due in large part to the innovative solutions and synergies produced through the integration of design and construction activities.

Throughout the multi-phase project, B&M's Facilities Management & Operations (FMO) team worked closely with the prime contractor to ensure smooth transitions from construction to operations. B&MFMO is the service provider for the project's 30-year concession period, which commenced in April 2013 and continues until March 2043. Our team is responsible for all facilities management services at WCH, including plant operations, roads and grounds, energy and sustainability, utilities management, help desk/central dispatch, and security and surveillance.

B&M FMO reports on specific metrics each month as part of our ongoing internal auditing to ensure full compliance with the Project Agreement and accurate self-reporting. Our Energy & Sustainability team has entered into a pain share/gain arrangement with WCH to motivate both partners to continue to seek out innovative solutions to support energy savings and sustainable operations at one of Canada's premier health care facilities.

Top: Facility Technician Wayne Bissoon on site at WCH.
Bottom: Participants in B&M's 2018 Take Our Kids to Work event enjoy a tour of the facility.

B&M Celebrates Launch of Northeast US Group

Black & McDonald recently celebrated the official opening of a new location in Syracuse, New York. Our new Northeast US (NEUS) group will be led by Chuck Mossman, Regional Vice President of the Southern Ontario Utility Region. Phillip O'Connor has been promoted to Department Manager and will oversee day-to-day operations. NEUS offers EPC (Engineering/Procurement/Construction) services for substations and switchyards, as well as high voltage testing and commissioning.

B&M's expansion to New York State was made possible by the hard work and dedication of Southern Ontario Region administrative staff in close collaboration with our US Operations team. The NEUS group will combine capabilities and personnel with B&M's Kansas City team and our Georgia-based Energy and Infrastructure group to deliver on large-scale energy projects across the United States.

B&M's new NEUS team (left to right): David Maine, Greg Hungerford, Steve Bellows, Ray Meyer, Adrienne Abear, Darren O'Neill, Phillip O'Connor, Rob Ruley, Mark Wheatley, Mike Maine and Bruce Emerson.

Celebrating Employee Engagement

At Black & McDonald, we believe employees are our greatest asset. As part of our efforts to enhance employee engagement, we are committed to regularly obtaining feedback and input through our annual Employee Engagement Survey.

Now in its 15th year, the survey is a key platform for employees to share their experiences and ideas, and provide confidential feedback. This feedback has been the catalyst for the introduction of corporate initiatives such as the Wire and Yammer to improve communication and access to resources; our Talent Development programs to enhance career development opportunities; a Long-Term Service Awards program to recognize employee dedication to the company; and countless Health & Safety initiatives to ensure our employees return safely to their families each and every day.

Since 2004, we have been humbled to receive encouraging employee engagement scores that exceed our high internal targets, as well as industry benchmarks. While this assures

us that B&M continues to be a great place to work, we remain committed to taking action on employee feedback and creating actionable steps to improve overall employee engagement.

Our overall company target for 2018 – 2019 is 84 percent, which includes an employee participation target of 75 percent and a promoter score of 85 percent, based on the question, "I would recommend this organization as a good place to work."

We care about employee engagement because an engaged workforce means our people feel energized, passionate, dedicated and invested in their work and our organization. We look forward to receiving your feedback this year and working with you to turn your ideas into meaningful actions through 2019 and beyond.

Logan King
Corporate Director, People Resources

CBO Staff Pitch In to “Fill a Purse for a Sister”

Wanda Raycraft (top left) and Amanda Fawcett (top right) show off the items donated by CBO staff (bottom).

Over the past couple of years, CBO's Collingwood office has initiated a “charity” chocolate bar and chips station, strategically placed close to the coffee pot in the kitchen. For a mere dollar or two, employees can satisfy that 3 o'clock craving while supporting a worthy cause. In 2018, Collingwood snacked a lot and in the process raised significant funds to donate to local charities.

One local non-profit that benefitted this year was the Fill a Purse for a Sister Campaign, an Ontario-based initiative that provides new and gently used purses filled with personal necessities to women's shelters, social service agencies and crisis centres. The cause recognizes that many women living in precarious housing situations have fled their previous circumstances with nothing in hand—not even their purse. By providing stocked purses to these women, the campaign looks to restore the feelings of dignity and security that this simple yet essential item can provide.

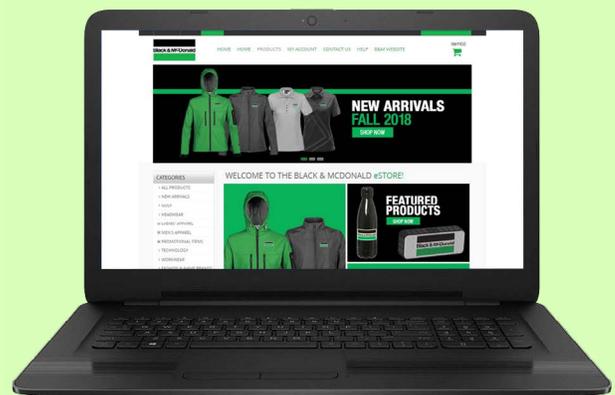

The generosity of Collingwood staff allowed the team to contribute seven purses stuffed to the brim with personal items. The purses were delivered to My Friend's House, a safe haven for women and their children escaping domestic violence. Thank you to everyone who contributed to show these women we care.

Employees Give B&M's New eStore a Big Thumbs Up!

Black & McDonald's new eStore has been a big hit with employees since its launch on November 12, with 275 new registrants and more than \$45,000 in orders. This response shows the enthusiasm and pride our employees feel when wearing the B&M brand. The new eStore gives our people access to a wealth of high quality merchandise at competitive prices, and offers the right B&M-branded gear for any occasion.

The eStore's interactive platform and intuitive user experience has also driven the popularity of the new website. The site is mobile friendly, available in French and English, and provides flexible options for both shipping and method of payment. All these new features make placing an order quicker, easier and more convenient than ever before.

Finally, our expanded collections of apparel, brand name outerwear and promotional items have captured current trends and the attention of our employees. The Marketing team will

review what's available on the eStore on an ongoing basis to ensure our selection remains up-to-date and continues to spark excitement throughout the B&M community.
